

## TECHNICAL DATA SHEET

# AQUATREAT NEUTRALCAL

Last revision: 20.05.2020

### DESCRIPTION

- AQUATREAT NEUTRALCAL is a liquid product that contains alkali.
- AQUATREAT NEUTRALCAL can be used to increase the alkalinity or the pH of the boiler water or boiler feed water.
- AQUATREAT NEUTRALCAL can be also used to passivate the metal and to neutralize acid rests after an acid cleaning.

### PROPERTIES

- Appearance: Colourless liquid
- pH: > 11
- Density: 1,15 ± 0,02
- Solubility in water: infinite

### DOSAGE AND CONTROL

Boiler water treatment: AQUATREAT NEUTRALCAL will be injected diluted, alone or together with other treatment chemicals, continuously in the feed water line or directly in the boiler. AQUATREAT NEUTRALCAL will be dosed so that the alkalinity corresponds with the control limits.

Acid cleaning: a concentration of 2-5% of AQUATREAT NEUTRALCAL solution will be circulated after the acid cleaning to passivate the metals and to neutralize remaining acid.

### PACKAGING

Polyethylene drums of 22 or 220 litres, containers of 1000 litres or bulk.

### HANDLING

AQUATREAT NEUTRALCAL is corrosive and irritating on skin and eyes. Wear protective gloves/clothing and eye protection. In case of contact, rinse with plenty of water. For more information, read the safety data sheet.

All the given information is correct to our current knowledge. None of the indications, compositions or applications have the intention of violating existing patents. Nothing may be duplicated and/or multiplied without our written consent.
